I am a software developer with a passion for creating dynamic and user-friendly mobile apps and websites.

I thrive in collaborative environments and cherish teamwork. I like to focus on the problem at hand from a product-first perspective. Meaning that instead of jumping to an immediate solution, we could achieve the same objective with a UX tweak or a change in perspective.

I always bring a cheerful and proactive attitude to every project. When I am not coding, you will find me hitting the gym for some CrossFit sessions. In my free time, I like to build games and applications to keep improving my skills with more tangible objectives.

Match Up – October 2023

A card matching game with unlockable content and increasing complexity over multiple stages.
